

AGRISPON®

Apples

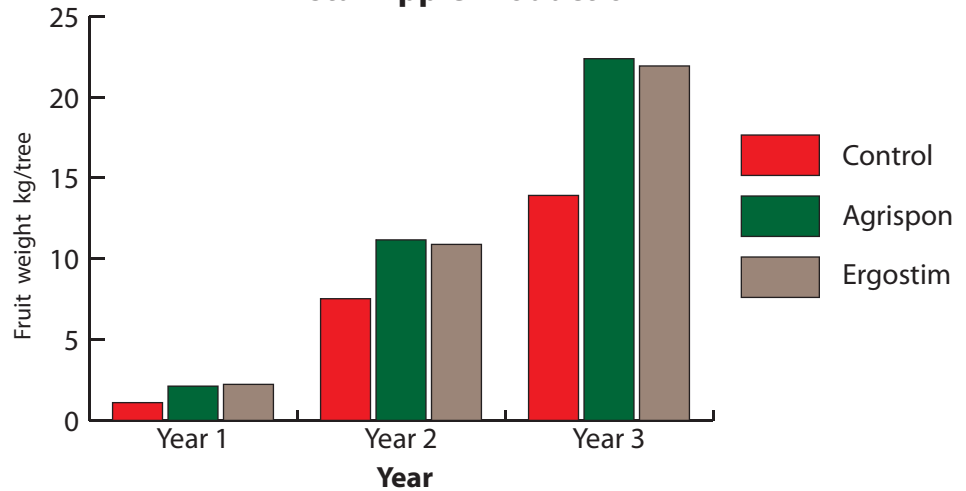

Croatia

Agrispon and **Ergostim**: Sprayed twice each year, three weeks after flowering and 10 to 15 day later, to the leaves at 1 liter per 1,000 liters of water per hectare for three years.

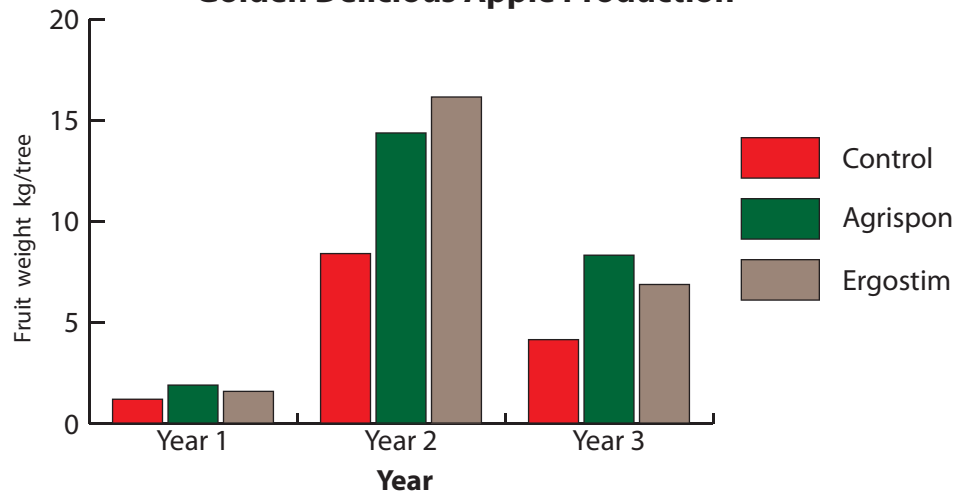

Control: received neither product.

Six replicates, three trees per plot for each variety in a randomized complete block design, a total of 108 trees.

Elstar Apple Production

Golden Delicious Apple Production

Total Chlorophyll Contents of Apple Leaf Tissue 24 days After Agrispon and Ergostim Treatments
