

AGRISPON®

Cotton

China

Cotton yield was maintained or increased with nitrogen reduced to 60% of normal plus Agrispon.

All plots received superphosphate at 150 kg/hectare. Agrispon was applied twice, each application at 1 liter per hectare but a different time for each treatment. Application times were:

- 1) June 20 & July 13
- 2) June 20 & August 2
- 3) June 19 and July 12
