

Yield increase with Agrispon:
 +12% at El Fayoum
 +17% at Tamyia
 +20% at Atsah
 +17% average of the 3 areas.

Data from a total of 12 replicated plots.

Plant height, Root length, Number of seed heads and grain head branches, Seed head length, Number of seeds per seed head.

Governorate	Plant height, cm		Root length, cm		Number of heads		Length of head, cm		Number of seeds per head	
	A*	C*	A	C	A	C	A	C	A	C
El Fayoum	112.15	105.95	14.45	10.60	40.60	29.91	19.48	16.67	73.70	63.44
Atsah	108.75	97.43	17.03	13.85	41.57	29.86	18.57	18.08	69.17	55.50
Tamyia	76.07	70.89	14.42	11.51	44.02	29.82	18.96	18.62	97.07	87.24
Average	94.64	92.95	15.11	10.63	39.56	21.55	18.89	17.11	83.44	71.84

A* = Agrispon
 C* = Control

1. Greater plant height.
2. Increased root length.
3. More tillering.
4. Greater number and size of grain heads.
5. More kernels of rice per head.
