

AGRISPON[®]

Flowers

Colombia

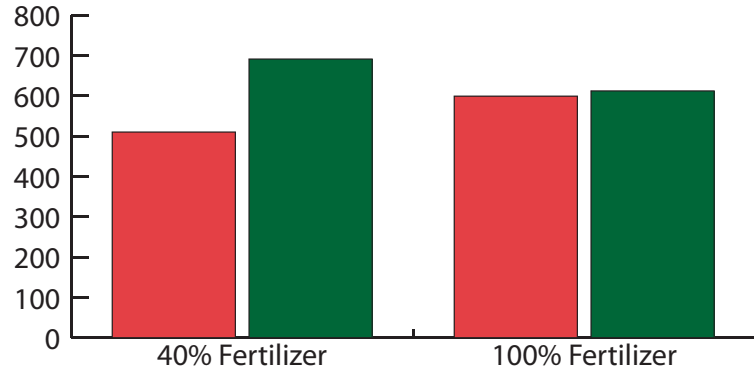

When Agrispón was substituted for the normal treatment the amount of production remained the same or increased slightly.

Agrispón treatment at 1.5 cc/m².

Normal treatment was Ergostim + Cytozyme at 0.4cc or 0.5cc per liter of water.

Primary nitrogen fertilizers used were urea (45% N) at 1 to 1.5 g/liter of water, and Ca (NO₃)₂ at 3 g/liter of water.
