

SINCOCIN®

Tobacco

Croatia

Sincocin 1 + Agrispon received 50% N, the other treatments received 100%N yet this treatment provided the greatest yield.

Treatments:

Sincocin 1 -1.0 L/ha

No seed treatment.

Foliar and soil surface spray of Sincocin at 10 days after transplanting (DAT)

Sincocin 2 -1.0 L/ha

Seeds was soaked with 5% solution of Sincocin for 24 hr. and incubated for 12 hr. then sown.

Foliar and soil surface spray of Sincocin at 10 DAT.

Sincocin 1 + Agrispon - each at 1 L/ha

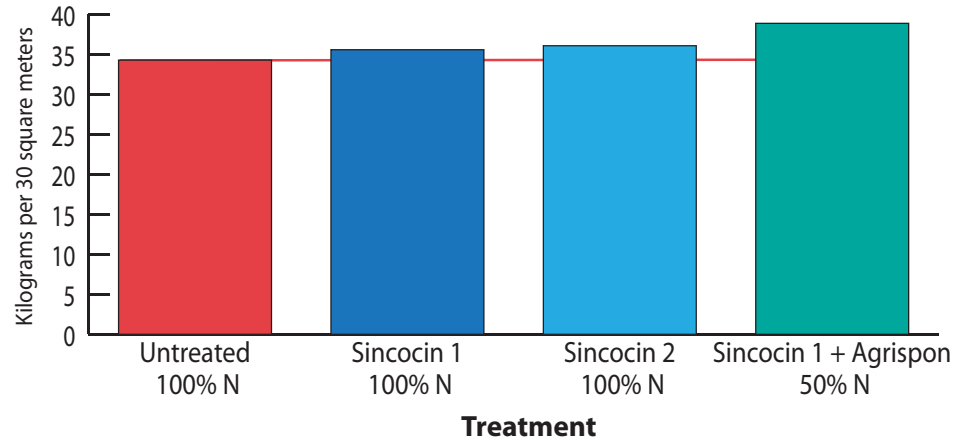

No seed treatment.

Foliar and soil surface spray of Sincocin and Agrispon at 10 DAT.

The amount of nitrogenous fertilizer applied was 50% reduced (*).

A randomized complete block design using four replications

Fresh Leaf Yield

Nematode Density Per 200 grams of soil
