

# AGRISPON®

# Potato

United Kingdom

**Agrispon:** 1 L/ha or 1 gal/10 acres

**Nitrogen:** 9-24-24 + ammonium nitrate  
(34.5% N)

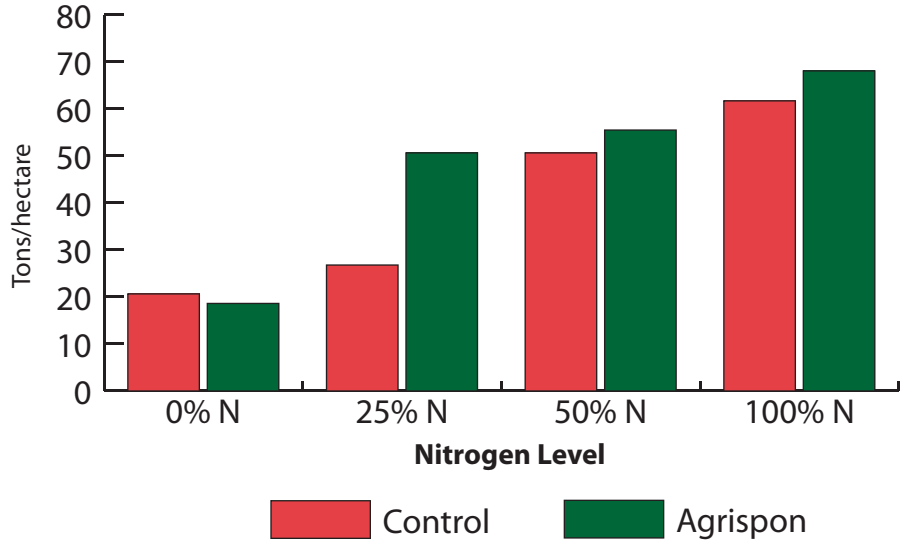

**100% N:** 350 Kg N/hectare (312 lb/acre)

**50% N:** 175 Kg N/hectare (156 lb/acre)

**25% N:** 87.5 Kg N/hectare (78 lb/acre)

Nitrogen levels of 25 and 50 percent were broadcast and raked in the soil before planting; while half of the 100 percent level (170 kg ha/N or 152 lb./acre N) was broadcast and raked in the soil before planting and the remaining half was applied 5 weeks later, as top dressing, when plants had developed 2-3 leaves.
