

SINCOGIN®

Soybean

Vietnam

Sincocin: 1 L/ha (1.1 gal/10 acres). Foliar and soil surface spray at 5 days after sowing, normal fertilizer.

Sincocin 1: Seeds soaked with 5% solution of Sincocin for 12 hours, incubated for 12 hours then sown.

Sincocin 2: No seed treatment.

Sincocin 2 + Agrispon: Sincocin 2 treatment plus Agrispon at 1 L/ha (1.1 gal/10 acres) at 10 days after sowing. Nitrogen reduced 50%.

Mocap 10 G: 20 kg/ha (18 lb/acre), 7 days after sowing, normal fertilizer.

Normal fertilizer formula:

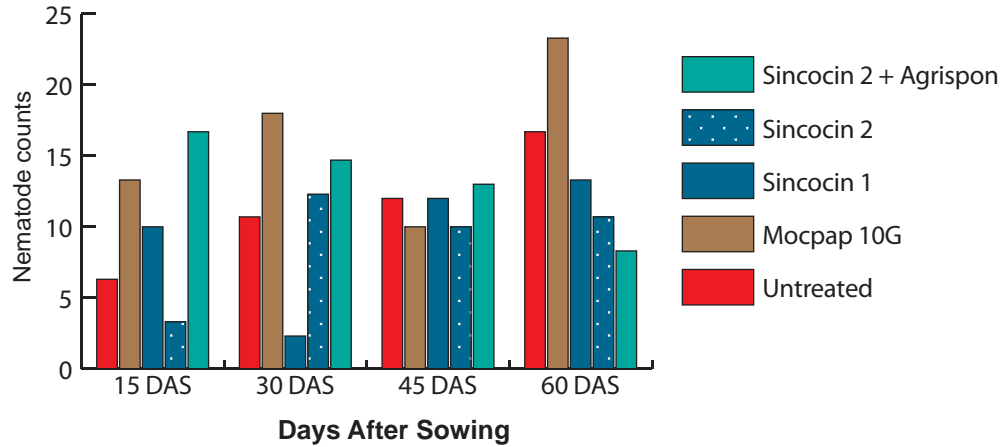

Basal application: 25 kg DAP

10 Days after sowing: 25 kg DAP + 25 kg Urea

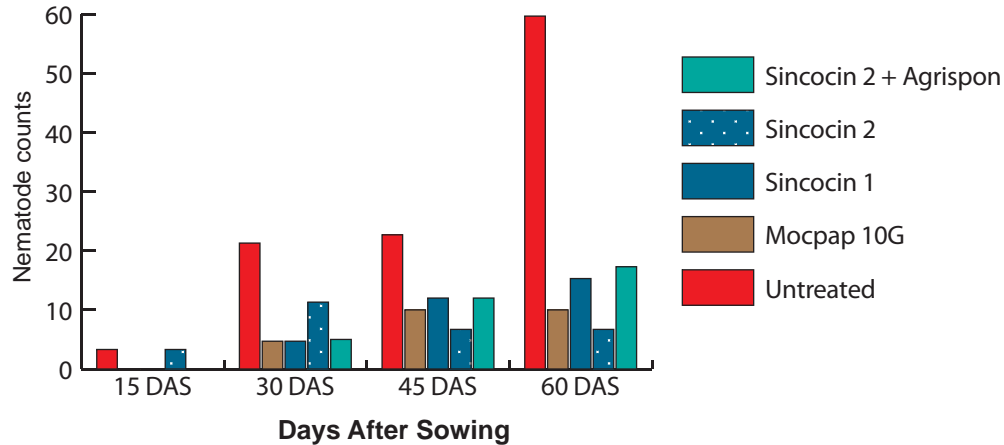

Early flowering stage: 50 kg Urea

Kernel forming stage: 25 kg Urea

Density of *Helicotylenchus* Nematodes per 200 Grams of Soil

Density of *Tylenchorhynchus* Nematodes per 200 Grams of Soil

Density of free-living nematodes Nematodes per 200 Grams of Soil)
